Helping People Help Pets

The Long Stay Cat Tracker is a historical spreadsheet that was maintained by the Cat Program Manager. Similar data is now able to be obtained through ShelterLuv without the need to maintain a spreadsheet. Data illustrated within this document is historic and only to be used as an example. Data includes the cat's basic information; age, length of stay; and the obstacle to adoption. This ensures no cat is forgotten in the system and tracks trends that may indicate a subset of the feline population is under-represented or needs additional focus to encourage adoption.
