Shelter Animals Count Coalition: Information for Shelter Partners

Join our Shelter Animals Count Coalition and the American Pets Alive! mission to end the needless killing of dogs and cats in animal shelters. Help us to create a world where every homeless animal counts.

What is a SAC coalition?
Shelter Animals Count is the only centralized animal shelter statistics reporting platform. SAC Coalitions are used by funders, state federations, and local coalitions to provide access to data from organizations with which they have a relationship. In this case, we utilize the SAC platform to gain access to data you submit to Shelter Animals Count, saving you time in reporting to multiple places. We require that if you are a student of the Maddie’s Lifesaving Academy that you join our SAC coalition.

How do I sign up for the AmPA SAC Coalition?
Follow these simple steps and you’ll be a part of the American Pets Alive! Shelter Animals Count Coalition, in no time:

1. If you are not yet signed up for Shelter Animals Count visit shelteranimalscount.org/register
2. Once you register your organization, or if you are already registered, log in to your account, select Manage Coalitions, and search for American Pets Alive!
3. If you get stumped, you’re in good hands, Shelter Animals Count has some of the most helpful how-to videos, ever. Here is a video that will walk you through the simple steps to register your organization.
4. For more information about data entry, watch this how-to video on data reporting.
5. If you have any other questions email us at inquiries@americanpetsalive.org
Why does AmPA! think this is important?

Data collection and sharing has quickly become an animal sheltering best practice.

Here are a few good reasons to collect and analyze your data using Shelter Animals Count:

- Grant and community funders ask for this information, and many ask for you to be a SAC participant
- Track lifesaving progress and success in your organization and community
- Build trust and ask for help by engaging your community through transparent shelter practices
- Help us in our efforts to ensure that every animal that enters into a shelter is counted
- AmPA! requires that you sign up if you attend an apprenticeship or a masterclass

Does everyone at a shelter get a username?

Shelter’s can have multiple users for their shelters. Their ED or CEO has to complete registration and will be prompted to do so with an email from SAC, once a shelter employee signs up for the first time.

What type of data will I have to share?:

You will be asked to share monthly data of all intake and outcomes for cats and dogs, across your organization. For more information on the type of data and entering your data each month, watch this how-to video on data reporting.

How much time will this take each month?

We recognize your time is valuable. We anticipate that our coalition partners will spend 10-20 minutes per month reporting their shelter statistics on Shelter Animals Count.
